3B

Climb smarter, together

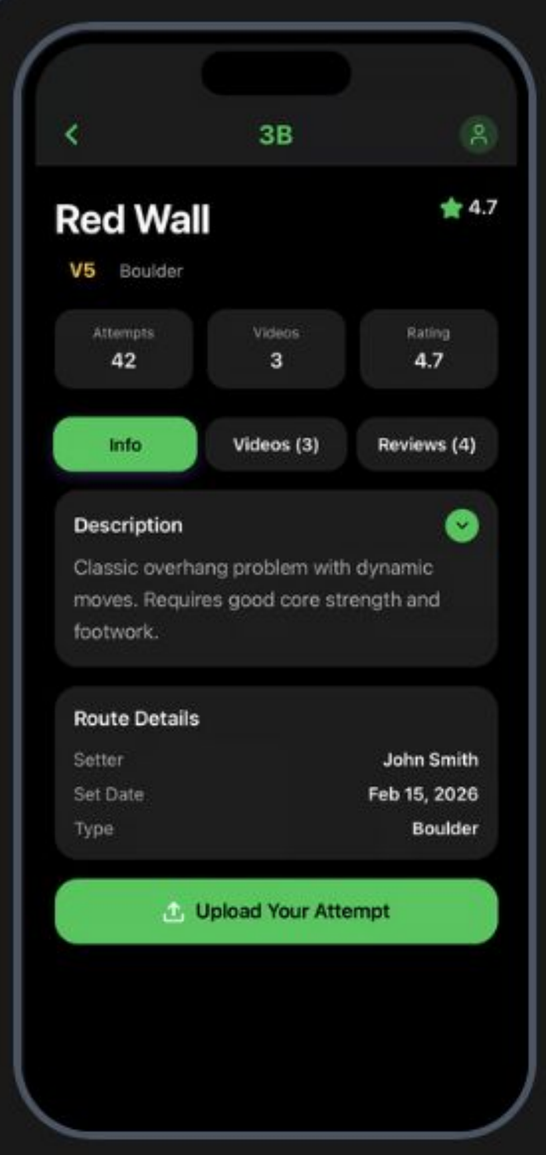
Problem

Climbers get stuck and need better beta and technique feedback, but reliable insights are hard to access, and existing solutions interrupt the experience, require fixed cameras, or depend on inconsistent personal recordings.

Solution

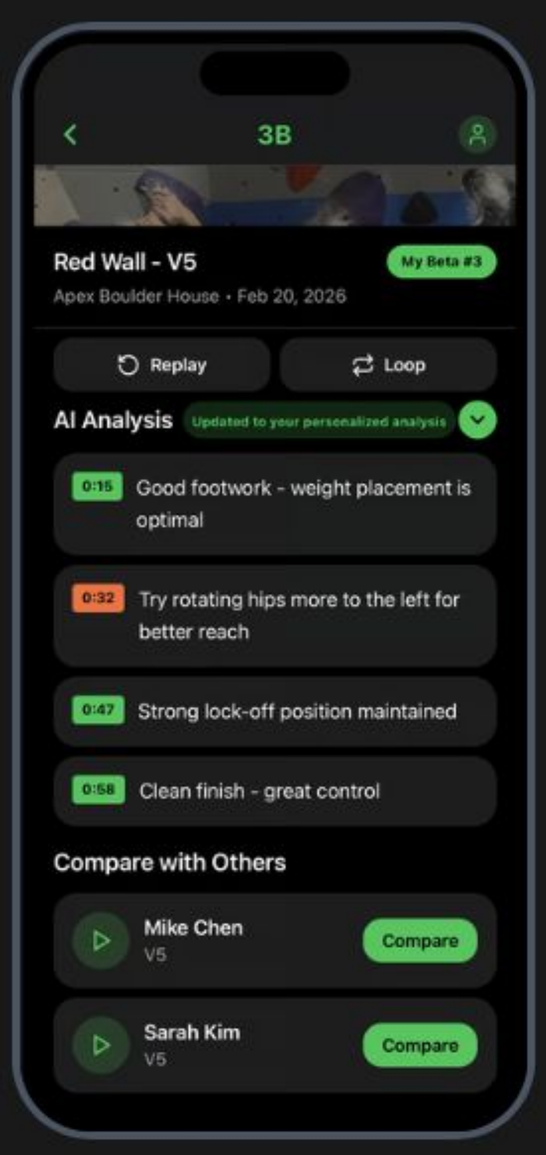
An AI coaching system that works in any gym, captures climbs seamlessly, and provides actionable insights, beta comparisons, and personalized analysis over time.

Key Features



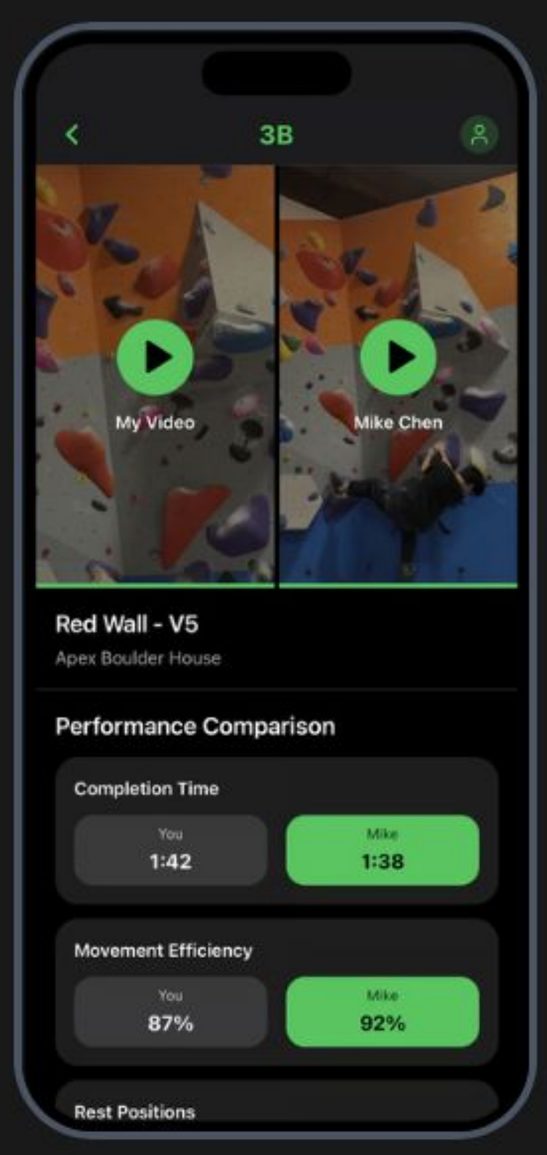
Route Details & Video Upload

Upload your climbing videos and view route info



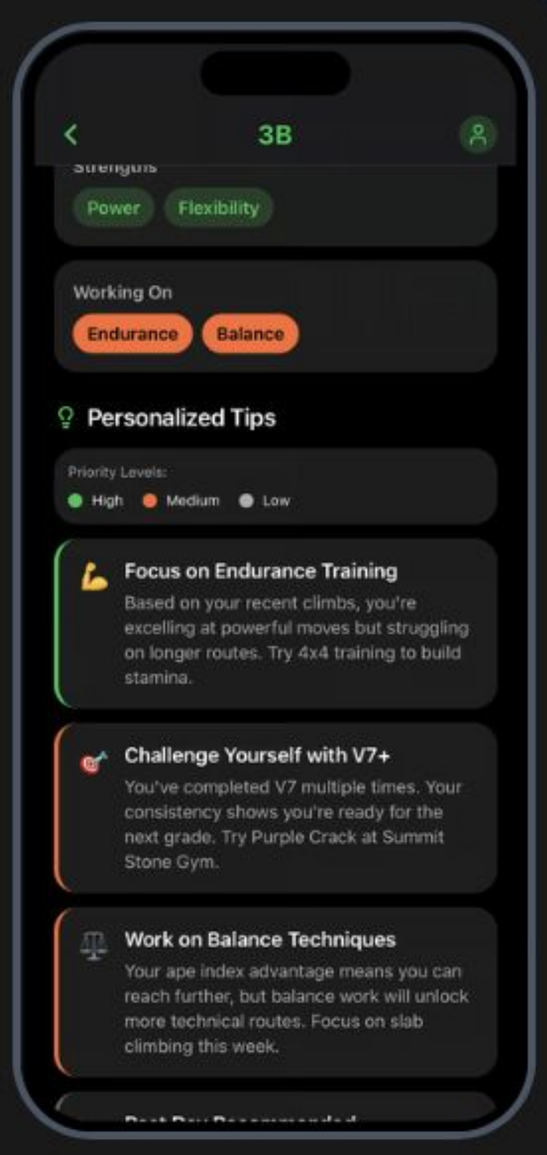
AI Analysis & Upload

Upload videos to get AI feedback on technique



Beta Comparison

Compare with other climbers



Personalized Insights

Track progress with AI recommendations

Design Process

1. Needfinding

Interviews with boulderers

2. Testing

User emotions mapping

3. Low-Fi

Paper prototypes

4. Med-Fi

Interactive prototype
